

Conversion of East London Museum Malacology database to Specify6

M. Cole, East London Museum

1) Malacology Dry collection 19000 records on Specify6, majority identified to species, with associated data: geo-referenced, habitat information supplied if available, date of collection, collector. 2) Malacology Wet collection 4000 records on Specify6, majority identified to species, with associated data: geo-referenced, habitat information supplied if available, date of collection, collector. (Once the users have been trained, ongoing addition of new records to Malacology collections and forwarding of these to SANBI. Not part of requested funding).
