

## **Basic data capture of botanical species collected in the Fernkloof Nature Reserve housed in the Hermanus Botanical Society Herbarium (HER)**

### **D. Marais, Hermanus Botanical Society**

Basic data capture of botanical species collected in the Fernkloof Nature Reserve housed in the Hermanus Botanical Society Herbarium (HER) D. Marais, Hermanus Botanical Society Entry into the Brahms database and submission to FBIP of greater than 5500 identified plant specimens representing greater than 1600 plant species in the Hermanus Herbarium as well as Vogelgat Herbarium. Targets would be to load at least 50 species per day onto the database. Specimens would be barcoded. Completion would be within 7 months. The aim is to capture all specimen data on vouchers from photographs of all specimens. Specimen photographs will be linked to data sets. Specimens are mainly Overberg Sandstone Fynbos species and Overberg Dune Strandveld species.
